

Radio Amica
Oc 7550 Khz amplitude
modulation
Tx on Friday evening,
Saturday and Sunday

Bologna 15/08/2009

Good morning: Patola Andrii

My name is Michele and am the founder and technical of Radio Amica

Thank you so much for listening to the report and as always is very useful to verify both the evolution of both the propagation rating of the issuer.

Radio Amica was born a few months and normally transmits only on Friday evening, the Saturday and Sunday.

The programs are currently few also seen the couple's age and often repeat a channel is called "Radio Antenna Verde.

The radio consists of a transmitter self built by 1kw carrier and the antenna is a $\frac{1}{2}$ wave dipole inverted goes about 18 meters in height.

I am sorry for this QSL in electronic form, but currently we do not have yet produced anything on paper.

Best regards

Michele.

technical information:
transmitter carrier power 1kW
Antenna : Dipole $\frac{1}{2}$ wave inverted v
